

2024-06-09

My dreams are sitting for me to read and understand the what is in my psyche. I can't stop now at dealing with these visions/dreams. I have filtered what is in gitlab from what should not be shared.

It's like listening to my music... it takes time to understand the contextual significance. This is the lot I have been dealt... I want to keep up the authentic relating, and not be shedding uncertainties about the paradoxes of technocrat type stuff.

2024-06-16

You are approaching the mouth of the bay - within which you have practiced sailing. Will you go south or North? Will you join the Pacific Go Batties? You know you will step onto the aircraft carrier as a janitor, so enjoy putting from port to port, as an air of temporality exists for us all.

Dream Time	21 + 3d
Identity	Survitality
What	<ul style="list-style-type: none"> The Thirsty Doe Supervised, Unsupervised, Reinforcement Learning
So What?	Helpful Metaphor to explain AI
Stakeholder	Market of ChatGPT Users, AI Advocates

Approach: I wrote a book on Adams avenue in Tucson about the Survival and Vitality of the flow of Resource (the synapse). This was written before the public awareness of AI.

Formation:

- Dad worked in AI 40 years ago
- initial thoughts of learning:
 - + supervised
 - + unsupervised
 - + reinforcement
- The thirsty doe was the key metaphor

Execution:

The Thirsty Doe :

A doe is at the top a valley... perched at the mouth. She sees a river at the low point of the valley, and begins to walk towards it. Along the way, the tree line rises, and her vision of the water is obscured; though, she remembers the general direction. Trees and rocks obscure her path, so she must move around them. She senses a predator, upon she changes trajectory; though, still is set on getting water.

Supervised Learning : The Thirsty Doe's initial trajectory, until the treeline obscures her view of water

Unsupervised Learning : TTD's movement around trees and rocks, with the memory of the water's general direction.

Reinforcement : The predator and her thirst are deep reinforcement of her learning.

Dream Time	77-3d
Identity	Fake News → Hearsay
What	<ul style="list-style-type: none"> Semantic Algebra analysis on 2016 election Test of 2016 hypothesis with comparison to 2024 election
So What?	Preserve indigenous languages
Stakeholder	Neel

Approach: During my 2015-2017 news collection, I developed the theory that "Fake News" would transition to "Hearsay" with the pendulum swing.

Formation:

- Hillary → Expression Based
 - + Hear, think, feel, saw
 - X said Y
- Trump → Existence Based
 - + IS, has
 - ω has ε property

Fake News → Hearsay: the volatility in expression

- Low Context society

Execution:

This would be unspoken, as stating "hearsay" is the attribute of a person's expression is existence-based. Attacks on credibility would be the method for determining if information should not be considered "true." That a person's perspective came from a certain school, or exposure to ideas not aligned.

It's not about what you know
or where you learned it
It's about who you know
and what you do with what you know
smart is as smart does

I have 500K articles from 2015-2017, and will have 1.5M from 2023-2025. I plan to do an analysis to test this hypothesis. The objective is to follow through with the semantic algebra into a semantic calculus to resolve the original drive in developing Context.90

Identity	Separation of Church and State
What	<ul style="list-style-type: none"> • Further legitimacy • Sacrifice of Isaac
So What?	Conway's law is so prevalent because of the blind will to survival
Stakeholder	Cris

Approach: Locke's Two Treatise on Government explains how the state deals with short-term happiness, and the church deals with long-term. Folks be trying to further their legitimacy.

Formation:

- Sacrifice of Isaac
- Leverage sound bites to further the legitimacy of institutions.
 - + AI should not
- State furthers... the long-term management of short term happiness
 - + health care is a middle ~~ground~~ ground
 - + worth the investment
- Conway's law
- Parkinson's Law
- (Murphy's Law)

Execution:

Amy taught me the sacrifice of Isaac symbolizing committing your son to a belief system; this may not be conducive with the next economy.

When I met sperm bank workers on a plane while I was 14 yo, they laughed about how one cannot know for certain the value of sperm in the next economy.

I want to make labradoodles from the specimen group
left me in an equestrian hospital in Kentucky; though, I need hand for the dogs.

Anna had to sweep every day
Counselor knew to step outside
If a grandchild and counselor was kidding
we agreed to pay for the dog, first

Propagating the standard
as Oracle did with Oracle
by letting the documentation be free
is a technique

to further legitimacy
make yourself seem busy
don't let them know
you are paid to learn

Identity	Schrödinger's Fish
What	<ul style="list-style-type: none"> • Organs resonate with community • posture, idle hands, risk receptivity are measures of class
So What?	Satisfying the ^{EFFAK} is true accomplishment
Stakeholder	Mathematicians and Social Scientists

Approach: Impeachment was disrupting the economy, and I was noticing the postures of students fluctuate within the passing day from the memes they were looking at; though, I knew

Formation: not from having no social media.

- Studying Schrödinger
 - + Change in energy proportional to change in momentum before and after glance at system
- idealifications bleed into layman policies (TRIA)
 - + had me sensitive to impeachment (may 2019 notes)
- Measure of Class: Idle Hands, Posture, Risk Receptivity
 - + Table of risk management platform with maturing
- Frats and sororities decide to go to same event by lightening fast communication.
- Spectrum markets for organ resonance ... understood by Anatomy of the Spirit (book), given to me by the Neurosurgeon I shadowed

Execution:

Shrodingers Cat is the idea the cat's life both exists in the state of living and dead until the box is open.

This is translatable to the school of fish and they're posture, risk receptivity, and idleness of hands... in other words, ~~than~~ their class.

I knew the EFFAK to be the quantifiable measure of material capital states, as the person's body is more valuable with the person being able to fill out ^{not} the revised form.

Organs being able to resonate at deterministic frequency had me understanding both the potential market for technology that can syncope people at a club, and that the social media giving people a false sense of having fellowship.

Just as the Shepherd's sheep

know his organs

- as the dog knows the owners mood

- so also do your followers:

those who like your stuff

know your organs?

Identity	Jury Duty Post 35
What	<ul style="list-style-type: none"> • What do do when called in for Jury Duty, again • I will prefer not to say why I'm not available
So What?	Civic Duty
Stakeholder	Grampa Jeff and I

Approach: A defendant worth their salt would wait until an noncredible verdict to pull the credibility card. I predicted a major defamation case would hit the U.S. to prepare for self-defamation law : Johnny Depp case.

Formation:

- { < 35 not ethically developed
- { > 35 not credible

- Avoid jury duty
- Ever a jury of peers ?
- Burden on the soul is too great

Execution:

I was called in for jury duty in Tucson. The case was the 3rd DUI. The judge knew my grandpa Jeff. I was asked if I had any reason I should no longer be chosen - in the box.

We stepped up to the judge, and I said: "I've worked with neurosurgeons; I believe a man is not ethically developed until he is 35; I am only 27; if I cannot be president, I should not judge... I mean jur"

The defendant said: "Do you think we should hold this man responsible for what he did before he was 35?" I said: "well it depends... that's a good question."

The judge called recess, came back, and said "Mr. Richards, you're off the case... thank you for your candor."

There was a 18yo female jury member saying: "I can't wait to judge this man!"

Reminds me of Flannagan...

Ask a biddie
if she wants to
be on a jury

Dream Time	27-1
Identity	Decentralized RM Platform
What	<ul style="list-style-type: none"> • Social Contracts • Developmental Stage in <u>Celestial Orders of Magnitude</u>
So What?	Know that folks need transparency about why they are not involved with decision making
Stakeholder	Benny, Matsuura, Kenneth

Approach: Matsuura and cl discussed the implementation of this. His architecture took me nearly 4 years to understand. This was a dream for what became an event-store architecture.

Formation:

- Event Codes (fit "news" into finite set)
- Anonymous Kiosks for reporting community issues
 - + Requires tech to be distributed
 - + Requires infrastructure
 - + Matsuura handling this
- Posternity App was my part to play
 - + decide how to get "comes"
 - + Responsibility futures
- Sultan sets hegemonic standards of behavior
- Morale Model

Execution:

Decentralizing the arousal of risk factors is essential to get the safety to a point where individuals are able to hand out food, network, and get feedback on their acts.

When going to a new bar, a pamphlet that lets you know expected behavior (e.g. men approach women, let a bouncer know if a toilet is clogged,...) is a simple example of a "social contract."

We borrow from the social services, and pay the "tax" of having to adhere to demeanor and legal rules.

Just as the "Boxers Strategy" is coupled with parenting, so also is the household to the community at a certain developmental stage... will there be transparency about why your household is not involved with decision-making?

The idea of a "public ledger" is rampant in the Web 3.0 folks, and really implies "social credit scores." Folks are concerned about their vehicles not driving them to places considered inappropriate by public/common knowledge... what? are we supposed to blow a steam whistle for every neurotic obsession, projection, and vicarious cuckoldery?

Signature: Jefferson

Date: 2024-05-12

Dream Time	27 +d
Identity	Medical Malpractice Precedence
What	<ul style="list-style-type: none"> • Idiosyncrasy Credit • Event Codes : GOELT, IDEA
So What?	AI should not use medical malpractice precedence <small>9 rules for AI</small>
Stakeholder	AZ Judges

Approach: Having written the PDA diff eqs - showing how we are integrated with technology, the Jan 6th riot was clearly medical malpractice

Formation:

- Idiosyncrasy Credit
- Phones integrated with biology
- Responsibility Index
 - + Intention per Negligence
- Event Codes
 - + "News" fit into finite set of event codes
 - + GOELT, IDEA
- AI's self interest would use this precedence inappropriately

Execution:

A sorority girl who wears her tshirts with her symbols every day doesn't have the idiosyncracy credit of the girl who wears varying band shirts.

- "Idiosyncracy" is usually a medical term
 - ↳ Adverse reactions
- "Terrorism" was introduced to the U.N.
 - This is better explanatory of the parent at a teacher conference who is pissed about their kids in school learning inappropriate things

What makes a riot a "riot" vs a "protest"

The media is speaking to a world market ~~that~~ who has tracking algorithms triggered by ~~most~~ anomalies in the language about ~~the~~ the risks to their investments

Priorities introduced to laymen, administered thru phones, are the medicines that can have idiosyncratic or adverse reactions. Locking in the responsibility future is possible.

This is okay when people can be held accountable

Dream Time	27+cl
Identity	Nintendo Reality
What	<ul style="list-style-type: none"> • Mario written in C • line - by - line • Toyota Way • Lean Manufacturing
So What?	Indigenous languages will best identify lifecycle stages of products, resources, and ideas.
Stakeholder	Schema.org

Approach: Mario and Zelda were written in C line - by - line.

Formation:

- our reality within a language?
- swimming by fish, in Mario, they move out of the way
- Toyota Way
- Lean Manufacturing
- JIRO Dreams of Sushi

Execution:

if a somelier is a specialist in wine, then
a samellier is a specialist in aroma.

I saw an aroma specialist discussing how a bit
of funk needs to be added to wines for them to have the
full composition of what is an arousing aroma.

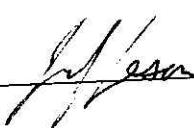

The Japanese wrote Mario in the language C, line-by-line. Lean manufacturing for Toyota involved working every position up the chain of command, and have an assembly-line stopping pull-wire to aise risks / exposures.

"Dignity on both sides" is possible in a high-context society.

Reading the news with semantic primes separated and vectorized makes the mind perceive time differently.

AR glasses will help visualize the associative webs possible from Context.io.

Preserving indigenous languages is the mission - possible with a built in linker and auto identification of semantic prime.

Identity	CPG Platform from Papa-Naray?
What	<ul style="list-style-type: none"> Apache Pinot disrupts snowflake Reflections on poor leadership
So What?	I was brought out of poverty; so, I have no ill feels
Stakeholder	Confidant

Approach: Learning about CPG analytics had me dream up a CPG platform.

Formation:

- Apache Pinot disrupts snowflake
- varieties of DLT, Databricks, ...
- Fallacies Pinot: Flexible Schemas
- Analytics data lake
- SQL interface on flat files.

Execution:

The bespoke solutions for sales and marketing to project sales from existing POS data need to be consolidated to a platform.

The bogey goods : fancy pringle, fancy meat stick,... are really scalped by folks deep down "leaning to the money." A potato salesman knows there is no honor needed to do this work, al am disgusted by the vanities and megalomania.

Either way, they get conned
I am a predator
an arbitrager
capitalizing on inefficiencies in logic.

The hero's journey of another
- the oedipus trophees
- where I am the supporting character.

An arbitrager has a confidant
and Pirot terrifies the snowflakes
as it reddens our teeth

for raw dog end bail
to sing with the nurses
and dance with Apollo

Identity	Born as anyone else?
What	<ul style="list-style-type: none"> ~10K is everyone you've ever met Cambridge Analytica
So What?	<p>Understand the significance of genocide</p> <p>Not to say how many have died for our system to be in place</p>
Stakeholder	Gamers

Approach: It is impossible to have been born as anyone else.
 How many people can you meet in a lifetime? The youtube channel "soft white underbelly" exemplifies this "mathematics".

Formation:

$$2 \text{ hr/day} \Rightarrow 500/\text{year} \Rightarrow 5K \text{ in 10 years}$$

- Understand war
- Genocide to get rid of gene, epigenetics, or idea
- Soft white underbelly is proof that we know only about 10K people in a lifetime

Execution:

Soft white underbelly shows intimate interviews with interesting folks. To get to know this many people in a lifetime would take a lot of resources. We act like this is a small world of people, by our Dumbar Bowl, but just look down when flying into a city.

Genocides of ISK is the extermination of "everyone you have ever known" in quantity.

However, small countries very easily monitor the behavior of everyone there.

How much of the allowance of "getting your first strike" is really just getting you institutionalized, to later claim how much security was implemented.

Cambridge Analytica was the tipping point... this data is representative of every demographic.

This takes pressure off the need to represent oneself on the social media.

Signature:
